Commercial Swimming Pool Contractors

About

---

## Commercial Swimming Pool Contractors

Like many in this industry Ryan McHale and David Taylor began their careers at a small local pool store. Soon, larger ambitions influenced them to branch out. The two formed a partnership; Precision Swimming Structures, which mainly focused on residential swimming pool construction. As their knowledge grew so did their ability and capacity. Soon after, David and Ryan began to explore more commercial ventures. **PSS Contractors** was formed when they shifted their focus exclusively on commercial swimming pool facilities. As their abilities increased to perform larger projects, they began to set their sites on opportunities outside of the greater Cincinnati market.

## CONSTRUCTION

---

(Pictured: Hyde Park Country Club, Cincinnati, OH)

Unlike most other commercial pool contractors, **PSS Contractors** has the capacity to build both concrete and stainless-steel swimming pools. PSS maintains its ability to work with most any aquatic consultant's design and specifications for a project. Specializing in creating pools for a variety of facilities working directly for the owner or as a sub-contractor.

## COMMERCIAL CONSTRUCTION

---

(Pictured: City of Mason Municipal Aquatic Center, Mason, OH)

**PSS Contractors** builds high quality commercial pools for both competition and leisure, serving various markets including:

water parks, competition swimming, educational facilities, private clubs, country clubs, gym & wellness, recreational, multi-family, resorts, and healthcare facilities.

## WADING POOLS & SPRAY GROUNDS

(Pictured: City of Blue Ash Family Wading Pool, Blue Ash, OH)

Once an afterthought of the commercial pool industry, spray grounds and wading pools have become a focal point / attraction for many modern aquatic facilities.

Stand-alone spray grounds also present an aquatic-play experience for facilities with a more limited budget.

## FOUNTAINS & WATER FEATURES

(Pictured Right: St. Frances Fountain, St. Louis, MO)

Water features have long been a way to enable facilities to harness the power of water for aesthetic purposes. From calming laminar string to exhilarating waterfalls, fountains and water features can make a significant impact to any environment.

## RENOVATION

---

*(Pictured: St. Xavier High School; Keating Natatorium, Cincinnati, OH)*

There are many benefits to renovating an aging aquatic facility. Extending life and creating a more comfortable and safer user experience are just a few. PSS Contractors continues to perform aquatic renovations throughout the Midwest region. Working with aluminum, stainless-steel, and concrete pools, PSS performs all scales of renovation from simple pool resurfacing to total facility renovation. PSS Contractors can alter the shape and depth of any pool; and maintains the staff and equipment to self-perform any project throughout the year.

**EQUIPPED TO HANDLE ALL  
OF YOUR COMMERCIAL  
AQUATIC NEEDS**

## DESIGN / BUILD

(Pictured: Hyde Park Country Club, Cincinnati, OH)

**PSS Contractors** is equipped and ready to deliver your project in full; from start to finish. As a design-build contractor; we specialize in architect-led design-build or ALDB. PSS works with firms, independent architects and aquatic consultants to minimize risks for the project owner. This allows PSS to reduce the delivery schedule by overlapping the design phase and construction phase of a project.
